1810/2 Improvement of Water Supply to the Madhugiri town

General and Revenue Secretariat | File No. 73 of 1942 | [App F III-2

Serial No 3

From the Dy of P H

No C 234-2 dy 16.9.42

States that the question of improvement of Water Supply to the Madhugiri town may in the circumstances referred, be may be postponed till the return of Normal Conditions

It is stated that there is a bore well which with an yield of capacity of 6000 gallons of water per hour the bore well is stated to be satisfactory and yields at present 2000 gallons per hour

An estimate for Rs 17000 for the improvement of Water Supply to the town stated to have been prepared by the Sanitary Engineer was sent to the Municipal President in Oct 1940 It is pending with him for want of funds The scheme included the installation of motors & pumping plant of greater capacity so as to yield the maximum yield of 6000 gallons, and the installation 23 public taps

As this estimate now shoots up to Rs 50,000 and as it is difficult to get a supply of diesel oil for running the machinery and the Mly is not in a position to bear the cost, the Dy of P H states that the proposal may be deferred till Conds the return of normal conditions as opined by the Sanitary

Submitted for orders

Improvement of Water Supply to Madhugiri town

File No 73 1810 of 1942

General and Revenue Secretariat

Serial No

5 This was one of the representations made to H.H. the Maharaja in the address presented to H.H. the Yuvaraj during his visit on 11.7.1942. The gracious reply of H.H. was that Govt attach the greatest importance to questions relating to the provision of water supply and drainage arrangements and would be prepared to help to the fullest extent possible in carrying out well-considered schemes. The approximate estimate for this work was for Rs 17000/- On account of the rise in the prices of articles etc, it is estimated to cost Rs 50,000/ at present. The Deputy Commr has expressed the opinion that the work of taking up the improvement in question may be postponed until normal times return.

Submitted for orders.

To

The Secretary to Government,
Law Department, Bangalore

Sir,

Re Improvement of water supply to Madhugiri Town

With reference to the observation of the Minister for Public Health and Local Self Government at the Central Health Committee meeting held on 27-8-42 that the present water supply to Madhugiri Town was very inadequate and that proposals must be submitted for an adequate water supply scheme to the place, I have the honor to state that the Sanitary Engineer inspected the town water supply on 3-9-42 He has submitted a report in which he states that the comprehensive improvement estimate for Rs 17,000 sent to the Municipal President in October 1940 is still kept pending with the Municipality for want of funds It is stated that the supply from the borewell is quite adequate for the needs of the town as the original estimate of Rs 17,000 will now cost Rs 30,000/- on account of rise in prices of materials and as Diesel oil is not available for running the installation, the Sanitary Engineer is of the opinion that the work of taking up the improvements may be postponed until return to normal times

A copy of Sanitary Engineer's letter No 292 dated 5-9-42 in the matter is enclosed for the information of Government

I have the honour to be,
Sir,
Your most obedient servant,

DIRECTOR OF PUBLIC HEALTH

JBR

Letter No 292 dated 5th September 1942 from the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, to the Director of Public Health in Mysore, Bangalore

---

Re - Improving the water supply to Madhugiri town

With reference to the above I have the honour to state that I inspected the town water supply on 3-9-42, with a view to find ways and means of improving the water supply to the town The town has got a satisfactory borewell with an yielding capacity of 4,000 gallons per hour The borewell is harnessed with 8 H P Oro sley engine and a pump set, pumping at present only about 2,000 gallons per hour A comprehensive improvement estimate for Rs 17,000/- was prepared and forwarded to the Municipal President for acceptance with this office No 748 dated 24-10-1940 the salient features of the estimate being replacing the existing ~~xxxxxx~~ 8 H P engine by a 15 H P engine and providing increased capacity pumping unit so as to be able to draw 4,000 gallons per hour New distribution pipe lines for 5,575 r ft with 23 more public fountains were also provided in this estimate This estimate is still kept pending with the Municipal President on account of want of funds Due to inordinate increase in the prices of materials, this estimate would now shoot up to about Rs 50,000/-, in the event of the work being taken up during this period It has to be stated that the supply from the borewell is quite adequate for the needs of the town, but the real trouble is the lack of finance in the Municipality to meet the cost It is also to be stated that Diesel oil is not available for running the installation Considering these points it is desirable that, the work of taking up these improvements is postponed until return to normal times

Since the Minister for Local Self Government and Public Health directed me to look into this question in detail and submit a report as already stated in my letter No 1769 dated May 27, 1942, these facts may kindly be brought to his kind notice
